RDA & Linked Data

Diane Hillmann,
Jon Phipps

Closed World and Open World

Why does this matter?

When we're working with RDA in RIMMF, which world are we in?

Jane advises:
We're not in
Kansas
anymore!

If we want to participate in the Linked Data effort, how do we need to think differently?

Some Big Picture Issues

- ❖ From records to statements
- ❖ Identity and identification
- ❖ Aggregation and distribution (why aren't we showing RDF?)

Jane asks:
More fun to
come?

- ❖ Integrating value vocabularies (not necessarily just RDA vocabularies)
- ❖ Extending RDA for special domains
- ❖ Internationalization

What's next?

Jane says:
Let's talk!

- ❖ Do you have an infrastructure at your institution for RDF?

- ❖ Would a searchable RDF repository help? We would welcome inquiries from potential partners.
