Although I wasn't RIMMFing, other participants would have preferred more "hands on" cataloguing time.

I was attending the RDA and Rare Materials Seminar in Edinburgh and thought this would be a good opportunity to attend a Jane-athon type event.

I can't fault the event - I didn't get what I wanted from it due to the others at my table not having as advanced a knowledge of the issues. The upside of this was that I got an ego boost re. my understanding of the issues!

You can only do so much in one day, so I set my expectations low. I was pleasantly surprised with the outcome and left the venue buzzing with new ideas.

Great understand of how RDA is evolving
12/7/2015 8:21 PM [View respondent's answers](#)

I learned how FRBR could work in practice. I have not worked with the online version of RIMMF. I have seen the paper version and attended presentations. But this was hands-on and pretty cool.

Great event. It would be great if at events like this, the first speakers give broad overview and the later get into the details .. to get everyone up to speed and on the same page.

12/7/2015 8:21 PM [View respondent's answers](#)

Spend more time on the actual RIMMF practice. 90 minutes wasn't enough for me. Even though I had taken the tutorials at home I still took extra time to understand RIMMF and work with it.
